Allowable Subject Matter

- 2. Claims 1-14 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses the sync signal including a sync pattern comprised of a bit pattern of a run length, and additional bit patterns which are arranged before and after the bit pattern which is longer than the maximum run length by 3T and the run length of the additional bit is longer than the minimum run length; and the sync signal including a specific code indicative of a position in the sector as claimed in claims 1, and 4. Furthermore, a connection bit of three bits arranged so as to satisfy the limitations of minimum run length is 2 and the maximum run length is 10 in a connection with the run length limited code existing just before the sync signal; a specific code of seven bits which satisfies the limitations of the minimum run length = 2 and the maximum run length = 10 and which has 32 kinds of bits patterns; and sync patterns of run lengths of (4T or -14T 4T) as claimed in claim 13.
